

## Research Conference

The upcoming ***Building Interoperability for European Civil Proceedings Online*** research conference will take place in Bologna on 15-16 June 2012. It provides an international forum for the presentation and discussion of the project findings and, not less important, it offers room to discuss national and trans-border experiences of e-justice. Also, the research conference wants to investigate the practices currently adopted by local courts to handle the European Payment Order and European Small Claims Procedures. For this reason, in each section there will be room for discussion among the attendees.

[Provisional Agenda](#)
